## 1. Know your product.

- Automatic gyroscope: Built in Gravity Sensor
- Multiple Network Protocol: Support ONVIF, GB/T28181, RTSP, RTMP, VISCA OVER IP, IP VISCA, RTMPS, SRT protocols; Support RTMP push mode, easy to be connected to streaming server (Wowza, FMS); Support RTP multicast mode;
- NDI Support: NDI® | HX version2
- Control Jack: RS422 input (compatible with RS485), RS232 input/output, RS232 (cascading connection)
- Low Power Sleep Mode: Support low power sleep/awake mode, and the power consumption is less than 400mW.
- Multiple Control Protocol: Support VISCA, PELCO-D, PELCO-P protocols; Support automatic identification protocols.
- Multiple Presets: Up to 255 presets (10 presets via remote control).

## 2. What's in the box

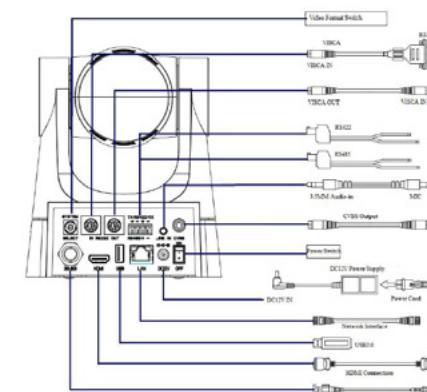

## 3. Product Features

The Broadcaster 30X camera offers perfect functions, superior performance and rich interfaces. The features include advanced ISP processing algorithms to provide vivid images with a strong sense of depth, high resolution, and fantastic color rendition. It supports H.264/H.265 encoding which makes motion video fluent and clear even under less than ideal bandwidth conditions.

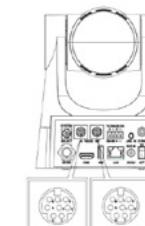

- Full HD image: 1/2.8-inch 2.07 million pixel high-quality image sensor, the maximum resolution can reach 1920x1080, and the output frame rate can reach 60 frames/second.
- Optical Zoom Lens: 30X optical
- Leading Auto Focus Technology: Fast, accurate and stable auto focusing technology.
- Low Noise and High SNR: Super high SNR image is achieved with low noise CMOS. Advanced 2D/3D noise reduction technology further reduces the noise while ensuring high image clarity.
- Multiple Video Output Methods: HDMI, SDI, CVBS, LAN for video output. Both video and audio can be output from HDMI, SDI, LAN at the same time. The transmission distance of SDI 1080p60 is up to 100 meters.
- Multiple Audio/Video Compression Standards: Support H.265/H.264 video compression, support AAC, MP3, G.711A audio compression; support up to 1920x1080 resolution 60 frames/second compression.
- Audio Input Interface: Support AAC, MP3, G.711A audio encoding. AAC, MP3 support 16000, 32000, 44100, 48000 sampling rate.

| 7 Video Format: 1080P25 | F: video format to be set on the menu |

**Note:** After turning the dial to change the video format, it will take effect after turning off and restarting the power.

## 5. How to use the device

### Video output

After turning on the camera, you will have an initial setup and the light on the receiver will flash. The camera will do a short pan and tilt tour to return to the home position, or if preset 0 is set, the camera will return to the preset 0 position.

### Network output:

Connect this product to your computer via a network cable, open the browser, enter the IP address of the camera (default 192.168.5.163) in the address bar, go to the login page and enter a username and password (by default "admin").

### SDI, HDMI output:

Connect the monitor with the corresponding video output interface.

### • Standby key

After a long press of 3', the camera will enter standby mode. Long press 3' again, the camera will self-diagnose again and return to the HOME position.

**Note:** If the power-on mode is on and preset 0 is set, and there is no operation in 12', it will automatically point to the specified preset position.

### • Camera direction selection

Select the direction of the camera you want to control.

Numeric key: Set or run presets 0-9.

Key \*, # : Use of the key combination.

Focus control key: Enter auto focus mode. Manual Focus: The focus mode of the camera is manual.

Change the focus mode of the camera to manual focus by pressing [Focus +] or [Focus -] to adjust it.

Zoom + = zoom in / zoom - = zoom out.

### • Set or Clear Preset key:

Preset: Preset key + number key 0-9. Clear Preset: Clear preset key + numeric key 0-9.

Pan/Tilt control keys: The arrows indicate the direction of the camera once you press it. "HOME" key returns the camera to the middle position or enter the following menu.

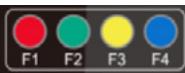

BLC control key: On/Off black light.

Menu setting: Open or close OSD menu.

Infrared remote control configuration: By pressing the key combination indicated below, we assign the remote control to the address indicated in Camera Select

[\*] + [#] + [F1]: Camera Address N° 1

[\*] + [#] + [F2]: Camera Address N° 2

[\*] + [#] + [F3]: Camera Address N° 3

[\*] + [#] + [F4]: Camera Address N° 4

**Note:** In practice this means that with a single remote control we can manage 4 cameras simultaneously

#### Functions when combining keys

[#] + [#] + [#]: Clear all presets

[#] + [#] + [1]: Switch the video format to 1080P50

[#] + [#] + [6]: Restore factory defaults

[#] + [#] + [2]: Switch the video format to 1080I60

[#] + [#] + [3]: Menu set to Chinese

[#] + [#] + [3]: Switch the video format to 1080I50

[#] + [#] + [4]: Menu set to English

[#] + [#] + [4]: Switch the video format to 720P60

[#] + [#] + [9]: Flip switch

[#] + [#] + [5]: Switch the video format to 720P50

[\*] + [#] + Auto: Enter aging mode

[#] + [#] + [6]: Switch the video format to 1080P30

[#] + [\*] + Auto: Exit aging mode

[#] + [#] + [7]: Switch the video format to 1080P25

[\*] + [#] + Manual: Restore the default user name, password, and IP address

[#] + [#] + [8]: Switch the video format to 720P30

[#] + [#] + [0]: Switch the video format to 1080P60

[#] + [#] + [9]: Switch the video format to 720P25

#### Using the remote control

After initialization is complete, you can receive and execute the commands from the remote control. When you press the button on the remote, the indicator light flashes, and when you release the button, the indicator light stops flashing. Users can control pan, tilt and zoom, as well as adjust and run presets using the infrared remote control.

#### Camera selection

Select here the camera you want to control.

#### Pan/Tilt

The arrows indicate the direction of movement of the camera.

Press and hold the up/down /left/right key and he will start moving, from slow to fast, until he reaches the end point. It will stop working as soon as you release the key.

#### Zoom control

Zoom in or out by pressing Zoom+ /Zoom-.

Hold down the key and the camera will continue to zoom in or out and stop as soon as you release the key.

#### Focus control

Focus near or far by pressing Focus+/Focus- (only valid in manual mode)

Select auto or manual to activate the function.

Focus will stop as soon as you release the key.

#### Presets, operation and delete

- Preset: To set a preset, select "SET PRESET" and then press number key 0-9. Note: the remote control has 10 presets.

- Preset: Directly press 0-9 keys to run a preset.

**Note:** Action in vain if there is no previous preselection.

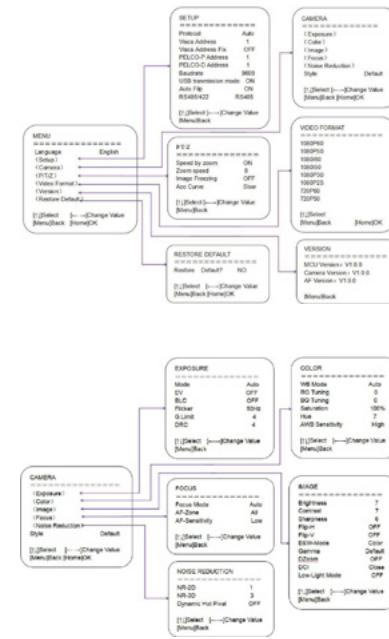

- Clear preset: To clear a preset, first press "CLEAR PRESET" key, and then press number key 0-9 to clear it.

Note: Press the "#" key three times in succession to cancel all the presets.

#### Menu settings

In normal operating mode, press the "MENU" key to display the menu, using the scroll arrow to point or highlight selected items.

This is the general outline of the camera menus and submenus.

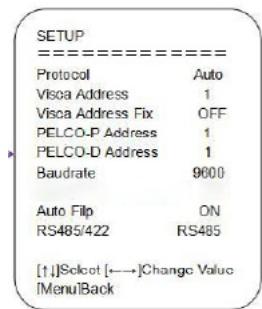

#### Initial menu

Use the arrows to scroll through the main menu and select the value you want to edit or set. Select "HOME" to go back.

#### Setup

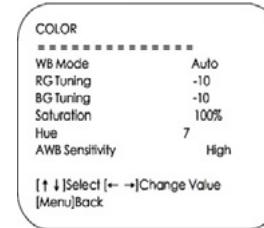

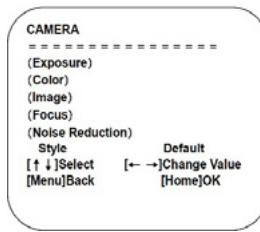

Move the pointer to (Setup) in the main menu, click "HOME". and enter the (Setup) as shown below

- Protocol:** Values: Auto, VISCA, Pelco-D, Pelco-P
- Visca Address :** Values 1-7 Default: 1
- Visca Address Fix :** Values On/Off Default: OFF
- Pelco-P Address:** 1-255 Default: 1
- Pelco-D Address :** 1-255 Default 1
- Baud rate:** 2400/4800/9600/38400/115200 Default.: 9600
- Auto Flip:** Values ON/ OFF Default ON;
- RS485/422:** Values RS485/RS422
- Use the arrows to scroll through the main menu and select the value you want to edit or set. Select "HOME" to go back.

## Camera settings

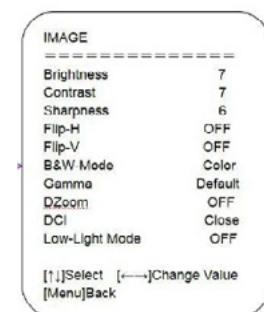

Move the pointer to the (Camera) in the main menu, click the "HOME" key and enter the (Camera) as shown below:

- **WB Mode:** Auto, Manual, OnePush, VAR
- **RG Tuning:** -10~10 (only available in Auto WB mode)
- **BG Tuning:** -10~10 (only available in Auto WB mode)
- **Saturation:** 0~127
- **Hue:** 0~8
- **AWB sensitivity:** High/Middle/Low (only available in Auto WB mode)
- **RG (Red Gain):** 0~100 (only available in manual mode)
- **BG (Blue Gain):** 0~100 (only available in manual mode)
- **Color temperature:** 2400K~7100K (only in VAR Mode)

### Image

Move the pointer to (IMAGE) in the main menu, click "START" and enter the (IMAGE) as follows:

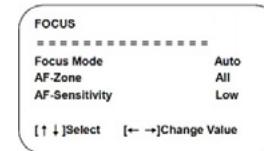

- **Brightness:** 0~100
- **Contrast:** 0~100
- **Sharpness:** 0~15
- **Flip-H:** OFF, ON
- **Flip-V:** OFF, ON
- **B&W-Mode:** Color, B&W
- **Gamma:** Default 0.45, 0.50, 0.55, 0.63
- **DZoom:** Digital Zoom Options: On/Off
- **DCI:** Close, Open
- **Low Light Mode:** On/Off

### Focus

Move the pointer to (Focus) in the main menu, click

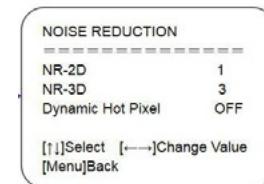

"HOME" and enter the (Focus) as follows:

- **Focus Mode:** Auto, Manual, OnePush
- **AF Zone:** All/Top/Center/Bottom
- **AF Sensitivity:** High, Middle, Low

### Noise reduction

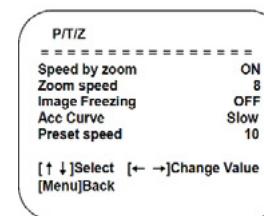

Move the pointer to (Noise reduction) in the main menu, click "START" and enter (Noise reduction) as follows:

- **NR-2D:** Values: Auto, Off, 1-8
- **NR-3D:** Values: Auto, Off, 1-8
- **Dynamic Hot Pixel:** Off, On

### PTZ

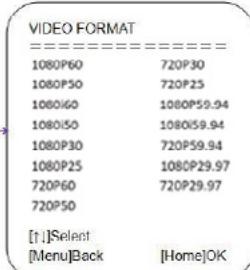

Move the pointer to (PTZ) in the main menu, click "HOME" and enter the (PTZ) as follows:

- **Speed by zoom:** Values: On, Off
- **Zoom speed:** Adjust the zoom speed for the remote control. Values 1~8
- **ImageFreezing:** On/Off
- **Acc Curve:** Fast/Slow
- **Preset speed:** 1-10

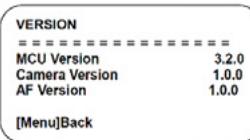

### Video format

Move the pointer to (Video format) in the main menu, click "START" and enter the (Video format) as follows:

### Version

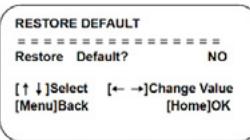

Move the pointer to (Version) in the main menu, click "START" and enter the (Version) as follows:

- **MCU Version:** Displays the MCU software version.
- **Camera Version:** Displays the software version of the camera.

**AF Version:** Displays the focus software version of the camera.

### Restore defaults

- Move the pointer to (Restore defaults) in the main menu, click "START" and enter the (Restore defaults) as follows:

• **Restore Defaults:** Yes/No (After restoring defaults, language, color and video format will not be restored.)

**Note:** If the previous remote control address is not 1, but other than 2,3,4, the corresponding camera address will be reset to 1 when all parameters are reset. User should change the remote address to 1 (press No.1 according to the camera to get normal operation).

Move the pointer to (Color) in the main menu, click "START" and enter the (Color adjustment) as follows:

## 6. Network connection

### 6.1 Connection methods

- Direct connection: Direct connections via "Crossover" network cable.
- Internet connection mode: Connection via a router or switch using a network cable between the camera and the router or switch.

**Note:** Please do not place the power and network cables where they can be easily touched to avoid poor video quality due to unstable signal transmission due to poor contact of the cables.

The computer must have the network segment to which the IP address of the camera belongs. The device will not be accessible if it does not have the segment. For example, if the default IP address of the camera is 192.168.5.163, segment 5 needs to be added on the computer.

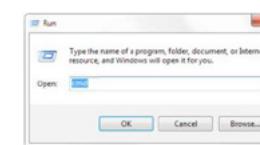

The specific steps are:

First of all, open the properties window of the computer's local area connection and select "Internet Protocol version 4 (TCP/IPv4)", as shown in the image on the left. Double-click or click the "Internet Protocol version 4 (TCP/IPv4)" Property to access the Internet Protocol version 4 (TCP/IPv4) properties window, select "Advanced" to access advanced settings of TCP/IP and add the IP and subnet mask in the IP explorer.

Select "OK" to finish adding the IP segment. User can add the corresponding network segment according to the revised IP address of the camera.

**Note:** The IP address to be added cannot be the same as that of other computers or devices. It is necessary to verify the existence of this IP address before adding it. Select "Start" and select "Run" to enter cmd as shown in the following image to check if the network segment has been added successfully.

After the self-test of the camera is finished, the user can also check the network connection by following the steps mentioned above. If the IP is the default, open the DOS command window, enter 192.168.5.163 and press "ENTER".

It will show message as below: which means network connection is normal.

### 6.2 Camera web interface

#### • Web login

After assigning an IP address to the camera, you can access the Web Interface by typing the camera's IP address in a web browser.

You can log in to this interface as an administrator or as a user. If you are doing this as an administrator, type "admin" in the username and password fields. If doing so as a user, enter "user1" or "user2" in the username and password fields. From the Web Interface, you can control the camera using the arrows on the left. You can also adjust many of the camera's settings through this IP interface.

#### Note:

- Login as administrator

Default username and password: **admin**

You have full access to configure all the parameters of the camera.

- Login as a user

Default username and password: **"user1" or "user2"**.

You can control the parameters of the PTZ camera and the tracking of the camera. You do not have access to the settings menu.

- Supported browsers: Google Chrome, Internet Explorer, Microsoft Edge, Firefox, etc.

#### Preview

After logging into the management interface, enter the video preview interface. On the preview screen, users can control PTZ, zoom, focus, video capture, sound, focus, full screen and set preset position, run, delete and other operations.

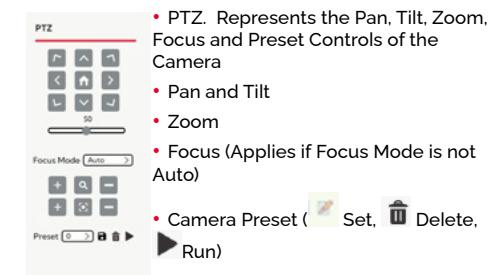

**Audio** Enable or Disable Audio

**Stream** Enable the Camera Stream as defined in the Video Configure menu

**Full** Show the camera image in full screen

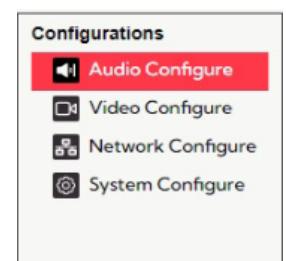

**Record** Enable camera recording. An external USB drive needs to be connected to the USB2.0 port of the camera. How to configure recording will be explained in more detail in the description of the recording menu.

## 7. Configuration of the camera

Click "Configuration" to enter the device parameter setting page.

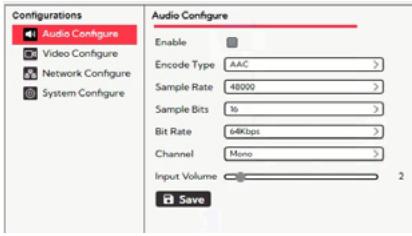

There are the following options: Audio Configure, Video Configure, Network Configure and System Configure

Detailed description see the following table:

Menu	Explanation
Audio Configure	Including audio compressing format, sampling frequency, sampling precision, compressing code rate settings etc.
Video Configure	Including video encoding, video parameters, character-overlapping, character size, video output setting etc.
Network Configure	Including basic parameters, Ethernet, DNS, wireless network setting, GB28181 etc.
System Configure	Including equipment property, system time, user management, version update, Reset, Reboot device settings etc.

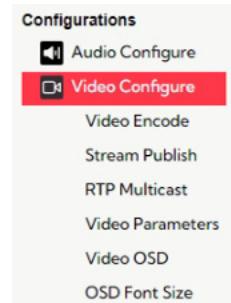

## 7.1 Audio Configure

- Enable:** Choose whether or not to activate audio.
- Encode Type:** Set the audio compression format and manually reset the device after change (MP3,PCM,AAC optional by default)
- Sample Rate:** Set the sampling rate and manually reset the device after change (MP3, AAC default 16000, 32000, 44100, 48000 optional, G.711A default is 8000)
- Sample Bits:** Set the sampling precision (default 16bits)
- Bit Rate:** Set the audio compression rate (default 64 Kbps, 32, 48, 96,128 Kbps optional)
- Channel:** Set the channel type (default mono, optional stereo)
- Input volume:** Adjust the input volume (default 2.1-10 optional)

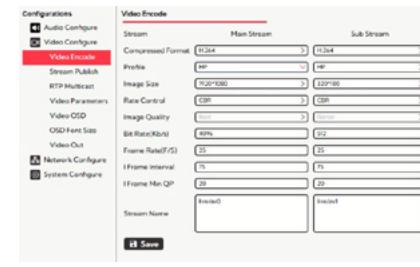

**Note:** Click "Save" and this message appears will appear. Reboot the camera for it to take effect.

## 7.2 Video Configure

### 7.2.1 Video Encode

You can configure the video stream parameters of the camera

- Compressed format:** Set video compression format, save to take effect (Main/Sub stream, default: H.264,H.265 optional)
- Profile:** Profile mode setting (default HP, BP, MP optional)
- Image size:** Adjust the video image resolution, save to take effect (main stream default 1920\*1080 optional 1280\*720, 640\*480; sub stream default 320\*180,optional 640\*360, 320\*240,640\*480, 1280\*720,1920\*1080 optional )
- Rate control:** Set the rate control mode, save to take effect (main/sub stream defaults to fix rate (CBR), variable bit rate (VBR) is for option)
- Image quality:** Image quality can only be changed when rate control is VBR, (default main stream is best, default secondary is better, optional values Best, Better, Good, Bad, Worse, Worst)
- Bit Rate (Kb/s):** Set the video bit rate (main stream default 8192 Kb/s,64-12288Kb/s optional; sub stream default 512 Kb/s,64-10240 Kb/s optional)
- Frame Rate (F/S):** Adjust the video frame rate (default primary/sub stream 30 and 25F/S, primary stream 5-30F/S optional, sub stream 5-30F/S optional)
- I Frame Interval:** Set the keyframe interval (Primary/Secondary stream default 90/75F, Primary/Secondary stream 1-150F optional. Secondary stream 1-150F

optional)

- I Frame Min QP:** Adjust the keyframe interval minimum QP (20 default, 10-51 optional)
- Stream Name:** When streaming via rtsp or rtmp, the user can modify the stream name. Main Stream(live/av0), sub stream(live/av1)

**Note:** Click "Save" button to pop up the message, then the settings will take effect

### 7.2.2 Stream Publish

You can configure the stream publish parameters of the camera when you want to broadcast live video on the internet

- Enable:** To turn on/off the main/sub stream.
- Protocol Type:** Main/Sub stream protocol Values: RTMP, RTSP and SRT
- Host Address:** IP addresses of the server (default 192.168.5.11)
- Host Port:** Host port number (default 1935.0-65535 optional)
- Stream Name:** Choose a different stream name (live/av0,live/av1 optional)
- Username:** Set the username. It does not apply in protocol type SRT
- Password:** Set the password. It does not apply in protocol type SRT
- Password for stream encryption:** only applies to protocol type SRT
- Crypto key length in bytes:** only applies to protocol type SRT Values 0,16,24,32

**Note:** Click "Save" button to display, then the settings will take effect

### 7.2.3 Multicast/Unicast:

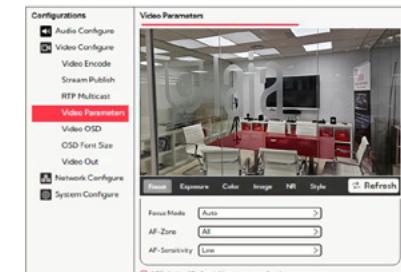

**Enable:** Main/Sub Stream: On/Off.

- Protocol Type:** RTP or TS.
- Address:** Default 224.1.2.3. It can be edited.
- Port:** Primary default is 4000, secondary 4002, and primary/secondary is optional from 0 to 65535.
- Access Method:** The address appears after setting. Ex: rtp://224.1.2.3:4000, udp://@224.1.2.3:4000, tcp://@224.1.2.3:4000

**Note:** Click "Save" button to display, then the settings will take effect.

### 7.2.4 Video parameters:

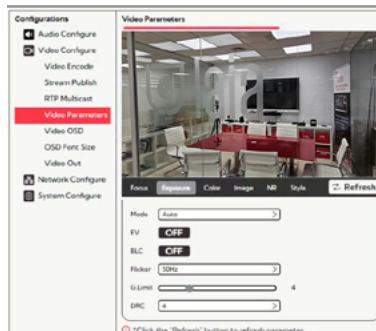

#### 1. Focus

- Focus Mode:** Set the focus mode (default auto, optional manual, one-push)
- AF-Zone:** Set the autofocus zone (default All, optional Top, Center, Bottom)
- AF-Sensitivity:** Set the focus sensitivity (default is low, high and middle optional)

#### 2. Exposure

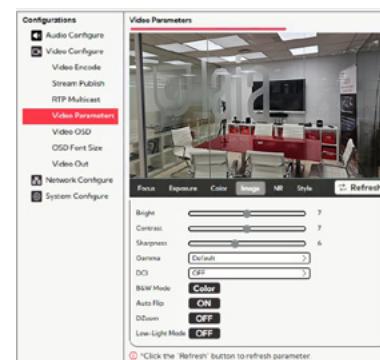

- Exposure:** Exposure mode, exposure compensation, backlight compensation, anti-flicker, gain limit, dynamic range, shutter, aperture, brightness, gain can be adjusted

- Hue:** 0~8
- AWB Sensitivity:** High/Middle/Low (only available in Auto WB mode)
- RG (Red Gain):** 0~100 (only available in manual mode)
- BG (Blue Gain):** 0~100 (only available in manual mode)
- Color temperature:** 2400K-7100K (only in VAR Mode)

#### 4. Image

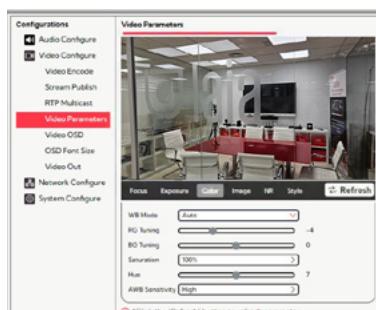

**Image:** You can adjust the brightness, contrast, sharpness, gamma curve, dynamic contrast, black and white mode, horizontal flip, vertical flip, electronic zoom, ultra-low illumination.

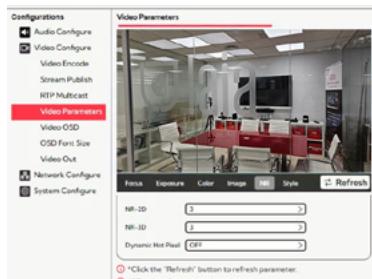

- Bright:** 0~100
- Contrast:** 0~100
- Sharpness:** 0~15
- Gamma:** Default 0.45, 0.50, 0.55, 0.63
- B&W-Mode:** Color, B&W
- Auto Flip:** ON, Off
- DZoom:** Digital Zoom Options: On/Off
- Low Light Mode:** On/Off

#### 3. Color

**Color:** White balance, saturation, hue, white balance sensitivity, red fine tune, blue fine tune, red gain, blue gain can be adjusted.

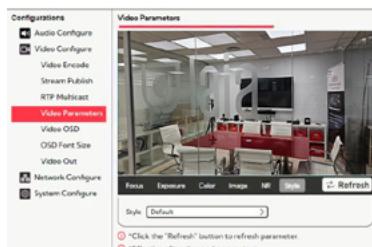

- WB Mode:** Auto, Manual, OnePush, VAR
- RG Tuning:** -10~10 (only available in Auto WB mode)
- BG Tuning:** -10~10 (only available in Auto WB mode)
- Saturation:** 0~127

- NR-2D:** Adjust the level of 2D noise reduction (default 3, 1~8 and optional off).
- NR-3D:** Adjust the 3D noise reduction level (default 3, 1~8 and off optional)
- Dynamic Hot Pixel:**

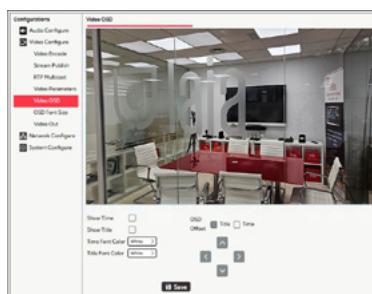

#### 6. Style

- Style:** Image selection (standard, brightness, clarity etc... can be configured)

- Style:** Values: Default, Normal, Clarity, Bright, Soft
- Note:** Refresh the page after changing the parameters for them to take effect.

#### 7.2.5 Video OSD

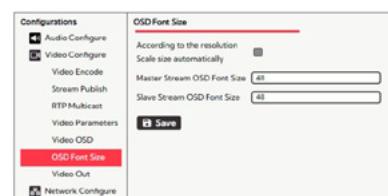

#### Character Overlay:

- Show time:** Yes/No

- Show Title:** Yes/No
  - Time Font Color:** Default white, black, yellow, red and blue optional
  - Title Font Color:** Default white, black, yellow, red and blue optional
  - OSD Offset:** Set the location where the time and title will be displayed. Press "up, down, left, right" button to move character location.
  - Title:** Set the title on the device property (default CAMERA1)
  - Time:** Set the time based on the system time (default 1970/01/01 05:36:00)
- Note:** Press "Save" button, the "Save the parameters successfully" window will pop up, which means the settings will take effect

#### 7.2.6 OSD Font Size

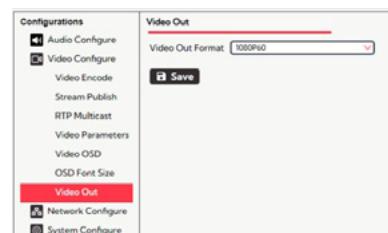

#### Character size:

- According to the resolution Scale size automatically: Enable/ Disable
- Master Stream OSD Font Size: Adjust the display character size, the device will automatically reboot after switching (default 48, 28-200 optional)

- Slave Stream OSD Font Size: Adjust the screen character size, the device will automatically reboot after switching (default 48, 28-200 optional)

**Note:** Click the "Save" button to pop up the "Save the parameters successfully" window.

#### 7.2.7 Video Out

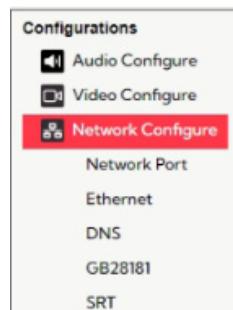

#### Adjustment of video output format

- Video Out format:** Values: 1080P60, 1080P50, 1080i60, 1080i50, 1080P30, 1080P25, 720P60, 720P50 Default: 1080P60

**Note:** Click the "Save" button to pop up the "Save the parameters successfully" window.

parameters successfully" window.

### 7.3 Network Configure

#### 7.3.2 Ethernet

- DHCP:** Activate or deactivate obtain IP automatically. After saving, please reboot the device to take effect (default: Off)
- IP Address:** Set the IP address (default 192.168.5.163)
- Subnet Mask:** Set the Subnet Mask
- Default Gateway:** Set the Default Gateway
- MAC Address:** It shows the MAC Address of the camera (Not configurable)

**Note:** Click "Save" button, it will be valid when "Save successfully" appears.

Once saved, please reboot the device to take effect

#### 7.3.3 DNS

- Preferred DNS Server:** Set the preferred DNS server. (Default 0.0.0.0)
- Alternative DNS Server:** Set the alternate DNS server. (Default 0.0.0.0)

#### 7.3.4 GB28181:

#### 7.3.1 Network port:

**Port Data:** Set the data port, the device will automatically reboot after changing it (default 3000.0-65535 optional)

**Port Web:** Set the web port, the device will automatically reboot after changing (default is 80, 0-65535 is optional)

**Port Onvif:** Set the Onvif port, the device will automatically reboot after switching (default 2000, 0-65535 optional)

**Port Soap:** Set the soap port (default 1936, 0-65535 optional)

**Port RTMP:** Set the RTMP port (default 1935, 0-65535 optional)

**Port Rtsps:** Set the RTSP port, the device will automatically reboot after switching (default 554.0-65535 optional)

**Port Visca:** Set the Visca port, the device will automatically reboot after changing it (default 3001.0-65535 optional)

**Port Https:** Set the http port, the device will automatically reboot after changing (default 443, 0-65535 optional)

**Note:** Click "Save" button, it will be valid when it shows "Save successfully".

- Enable:** Set whether to activate GB28181.
- ClockSync:** Enables/Disables time synchronization.
- VideoType:** Set the stream type (default Main Stream, optional Sub Stream)
- Registration Valid Time (in seconds):** 3600, range 5-65535.
- Heartbeat time (in seconds):** 60, range 1-65535.
- Register ID:** 34020000001320000001
- Register Name:** Default: IPC.
- Register Password:** Default: 12345678.
- Equipment Belong:** Users can add their own.
- Administrative Region:** Users can add their own.
- Alarm Areas:** Users can add their zobe.
- Device Address:** Users can add their own.
- Local SIP Port:** Default: 5060 Range 0-65535.
- Server IP:** IP address of the server GB28181.
- Server SIP Port:** Default: 5060 Range 0-65535
- Server ID:** Default: 34020000002000000001.

#### 7.3.5 SRT:

**Port SRT:** Set the SRT port (default 9000, 0-65535 optional).

**Password for the stream encryption:** Set the SRT password.

**Crypto key length in bytes:** Set the length of the SRT password (default 0, 16, 24, 32 optional).

**Note:** Click the "SAVE" button and this message appears

#### 7.3.6 NDI

**NDI Enable:** Enable or disable NDI feature

**NDI Name:** Defines the camera name for NDI applications

**NDI Group:** Defines the NDI group to which the camera belongs

#### 7.3.7 RTSP:

**RTSP Authentication:** Enable the RTSP authentication, default off, on optional.

**Note:** Changing the RTSP authentication parameters will take effect after the device is rebooted.

### 7.4 System Configure

#### 7.4.1 System Attribute

**Device Name:** Set the device name (Camera 1 by default, user can add their own)

- Device ID:** Set the device ID (default 1, read only)
- Language:** Set the system language (default Simplified Chinese/ English) It is necessary to log in again after modifying and saving the settings.

#### 7.4.2 USB Disk Store

You can record the video from the camera

USB Disk Store Settings  
Packet Type: M4V  
Packet Time(M): 1-240  
**Save**

USB Disk Info  
Device Name: /dev/sda  
Partition Name: /  
Capacity(M): 1000  
Free Space(M): 990  
Status: Connected  
**Format**

USB Disk Record  
Date Start: 2023-10-11  
Date End: 2023-10-12  
**Search** **Reset**

File Name	Size(M)
2023-10-11-15315.mp4	43
2023-10-11-15314.mp4	14
2023-10-20-18090.mp4	62
2023-10-20-18080.mp4	93
2023-10-20-14321.mp4	42

Page 1 of 1 **Delete** Displaying 1 to 5 of 5

You can view the recorded files on the USB disk.  
Press "Down", save the file on your PC and now you can play the video

#### 7.4.5 System Time

System Time  
Data Format: YYYY-MM-DD  
Date Separator: /  
Zone: IGMT-08:00Beijing, Hongkong, Sr.  
Hour Type: 24 Hours  
NTP Enable  
Update Interval: 1 day  
Host Url  
Host Port  
**Save**

Time Settings  
Time Settings: Synchronize with computer time  
Computer Time: 2023-10-30 16:47  
**Sync**

- Date Format:** Set the date format (YYYY-MM-DD, MM-DD-YYYY, DD-MM-YYYY)
- Date separator:** Set the date separator (default '/')
- Zone:** Set the time zone (default UTC+0 8:00, other time zones optional)
- Hour Type:** Set the time types (default 24 hours, optional 12 hours)
- NTP Enable:** Enable/disable NTP.
- Update Interval:** Set the automatic update interval of the NTP server. Valid after setting synchronization with NTP server (default one day, 2 / 10 days optional)
- Host Url:** Set the NTP server address or domain name (default time.nits.gov) Valid after setting NTP server synchronization.
- Host port:** Set NTP server port (default 123) Valid after setting NTP server synchronization from the NTP server.
- Time Settings**
- Time Settings:** Values: Synchronize with computer time, Synchronize with NTP server, Set manually
- Computer Time:** Only appears if Time Setting is

manually or computer time

#### 7.4.6 System User

User Set  
Authority: admin  
Username: admin  
Password  
Confirm Password  
**Save**

- Authority:** Set the type of user (the default administrator, user 1, user2 optional)
- Username:** Set the user name (select user admin, default admin. Select common user1, default user1, to select common user 2, default user2, user can modify their own)
- Password:** Set a password (select user admin, default admin. Select a common user1, default user1, to select a common user2 default user2, user can modify their own)
- Confirm Password:** Confirm whether the entered passwords are the same or not.

#### 7.4.7 Update

Release Upgrade  
MCU Version: V1.0.5 2021-12-13  
Camera Version: V1.0.2 2023-10-12  
AF Version: V1.0 2022-7-28  
NDI Version: V5.1.1 2022-2-10  
Update File: Select file  
**Upgrade**

- MCU Version:** Displays the MCU software version.
- Camera Version:** Displays the software version of the camera.
- AF Version:** Displays the focus software version of the camera
- Update file:** Click "Select File" in the pop-up window and select the update file, then press the "Upgrade" button. The update dialog box will pop up. After the update is done, the device will reboot automatically.
- Note:** Please make sure the device power and network can work during the update, if not, the update will fail. After the version upgrade is finished, you will need to restore factory defaults: a) restore factory defaults via web setting, b) restore factory defaults via menu, c) restore factory defaults factory defaults with the hot key '#6 on the remote control. Choose one of the three

methods above, in which the "a method" IP account and password are also restored to default.

#### 7.4.8 Default

Configurations  
Audio Configure  
Video Configure  
Network Configure  
System Configure  
USB Disk Store  
USB Disk Record  
Systime  
SylUser  
Update  
**Default**  
Reboot

**Restore factory defaults**

Select "Restore factory defaults button and choose "yes" or "no" in the pop- up window.

The device will automatically reboot and restore factory settings.

#### 7.4.9 Reboot

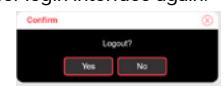

Configurations  
Audio Configure  
Video Configure  
Network Configure  
System Configure  
Systime  
SylUser  
Update  
**Reboot**

Press "Reboot" button and choose "yes" or "no" in the pop-up window,

The device will reboot automatically

#### 7.4.10 Log out

Click and select "yes" or "no" in the pop-up window. If you choose "Yes", you will exit the current page and return to the user login interface again.

## 8. Serial port communication control

In normal working state, you can control the camera via RS232/RS485 cable (VISCA IN). The RS232 parameters are as follows:

Baud rate: 2400/4800/9600/115200/second. Start bit: 1 bit.

Data bit: 8 bit.

Stop bit: 1 bit.

Check bit: None.

After power on, the camera will make a brief turn and return to the center position.

The zoom lens is moved to the farthest position and then backed out, after the self-test is complete.

### 8.1 VISCA protocol command list

#### 8.1.1 VISCA Protocol list

Ack/Completion Message		
	Command Package	Remark
ACK	z0 41 FF	Returned when the command is accepted.
Completion	z0 51 FF	Returned when the command has been executed.
Error Message		
	Command Package	Remark
Syntax error	z0 60 02 FF	Returned when the command format is different or when a command with illegal command parameters is accepted.
Command buffer full	z0 60 03 FF	Indicates that two sockets are already being used(executing two commands) and the command could not be accepted when received.
Command canceled	z0 6y 04 FF (y: socket No.)	Returned when a command which is being executed in a socket specified by the cancel command is canceled. The completion message for the command is not returned.
No socket	z0 6y 05 FF (y: socket No.)	Returned when no command is executed in a socket specified by the cancel command, or when an invalid socket number is specified
Command not executable	z0 6y 41 FF(y: Execution command Socket No. Inquiry command: 0)	Returned when a command canot be executed due to current conditions.For example, when commands controlling the focus manually are received during auto focus.

## 9. Specifications

## 9.1 Camera Lens Parameter

Model	Cute 30X
Optical Zoom	30X
Image Sensor	1/2.8 inch high quality CMOS sensor
Effective Pixel	2.07M, 16: 9
Video Signal	HDMI / SDI: 1080P60, 1080P50, 1080i60, 1080i50, 1080P30, 1080P25, 720P60, 720P50 CVBS: 576i, 480i LAN Main Stream: 1920x1080, 1280x720, 640x480 Sub Stream: 1280x720, 640x480, 640x360, 320x240, 320x180
Optical Lens	30X f=4.3, 129 mm
Viewing Angle	2.34°, N 65.1° W
Iris Value	F1.6, F4.7
Digital Zoom	X10
Minimum Illumination	0.5Lux(F1.8, AGC ON)
DNR	2D&3D
White Balance	Auto/Manual/One-push/Specified Color Temperature
Focus Mode	Auto/Manual/One-push
Exposure Mode	Auto, Manual, Shutter Priority, Iris Priority, Brightness Priority
Iris	F1.8 , F11, CLOSE

<b>Shutter Speed</b>	1/25, 1/10000
<b>BLC</b>	On/Off
<b>Dynamic Range</b>	Off, 1, 8
<b>Video Adjustment</b>	Brightness, Hue, Saturation, Contrast, Sharpness, Black and White Mode, Gamma Curve
<b>SNR</b>	>50dB

## 9.2 Interface Parameter

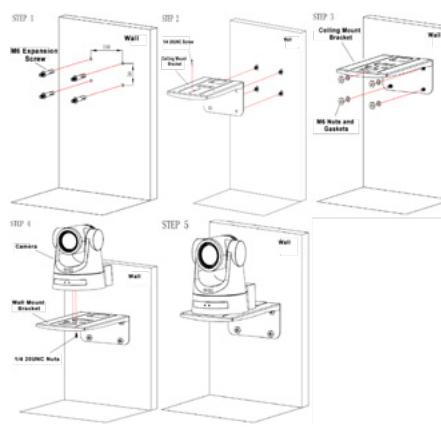

<b>Back Panel</b>	
Interface	HDMI, SDI, LAN, POE, NDI, CVBS, RS232-IN/OUT RS485, RS422, Audio-IN USB2.0(U disk storage)HDMI, DC12V Power Supply, Rotary Dip Switch, Power Switch
Video Output	HDMI, SDI, LAN, CVBS
Video Compression Format	LAN,H.264, H.265
Audio Input	Dual Channel 3.5mm linear input
Audio Output	HDMI, SDI, LAN
Audio Compression Format	AAC, MP3, G.711A
Network Port	100M Ethernet port, support POE power supply, support audio and video output
Network Protocols	RTSP, RTMP, ONVIF, GB/T28181, VISCA OVER IP, IP VISCA, RTMPS, SRT and NDI Support remote upgrade, remote restart, remote reset
Control	RS232-IN, RS232-OUT, RS422 compatible with RS485
Serial Port Communication Protocols	VISCA/Pelco-D/Pelco-P Baud rate: 115200/38400/9600/4800/2400
USB Communication Protocols	UVC, Video Communication Protocols), UAC, Audio Communication Protocols
Power Port	HEC3800 Power socket(DC12V)
Power Adapter	Input: AC110V~AC220V, Output: DC12V/2.5A
Input Voltage	DC12V±10%
Input Currency	<1A
Power Consumption	<12W

<b>PTZ Parameter</b>	
Pan Move	-170° - +170°
Tilt Move	-30° - +90°
Pan Speed	1.4°/s - 40°/s
Tilt Speed	2.9°/s - 30°/s
Preset Speed	Pan: 40°/s, Tilt: 30°/s
Preset Quantity	Up to 255 preset (10 via remote control)

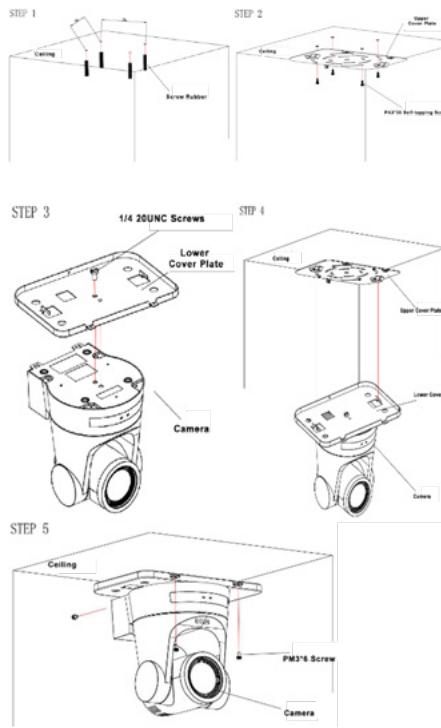

<b>Other Parameter</b>	
Storage Temperature	-10°C - 60°C
Storage Humidity	20% - 95%
Working Temperature	-10°C - 50°C
Working Humidity	20% - 80%
Dimension	143(L)mm*176mm(W)*169mm(H)
Weight	1.3kg
Environment	Indoors

## 10. Mounting options

### 10.1 Wall mounting

### 10.2 Ceiling Mount

## 11. Troubleshooting & tips

### 11.1 Camera maintenance

If you are not going to use the camera for a long time, turn it off. Use a soft cloth or tissue to clean the camera body. Use a soft, dry, lint-free cloth to clean the lens. If the camera is very dirty, clean it with a diluted neutral detergent. Do not use any type of solvent or strong detergent, as this could damage the surface.

### 11.2 Not recommended uses

- Do not photograph extremely bright objects for a long period of time, such as sunlight, ultra-bright light sources, etc.
- Do not use the camera in unstable lighting conditions, as the image may flicker.
- Do not use the camera near strong electromagnetic radiation, such as TV or radio transmitters, etc.

### 11.3 Problem solving

#### No image:

- Check if the power cord is connected, the voltage is correct, and the power indicator is on.
- Check if the camera can "self-test" after power on (the camera will briefly pan, tilt and return to the home position, or if preset 0, the camera will return to the preset 0 position)
- Check that the HDMI cable is connected correctly.

#### Abnormal image display:

- Check the setting of the rotary dial on the back of the camera. Be sure to use a resolution and refresh rate supported by the software.

#### Image shakes or vibrates:

- Check if the camera is mounted firmly or on a horizontal and level surface.
- Check whether the supporting furniture vibrates. Roof mounts tend to be more affected by building vibrations than wall mounts. Any external vibration that is affecting the camera will be more apparent when it is zoomed in.

#### Precautions

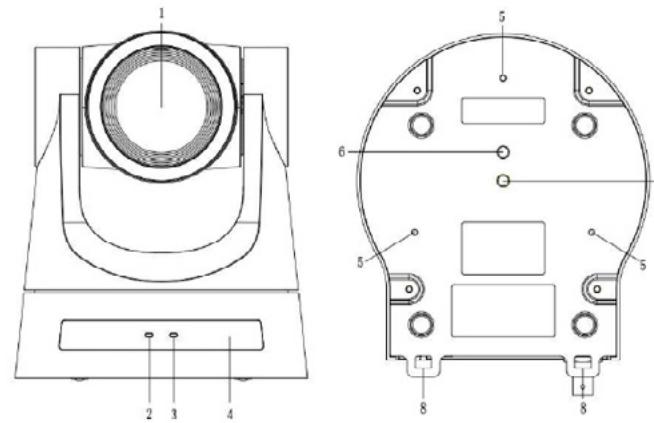

This product can only be used under the specified conditions to avoid any damage to the camera:

1. Do not expose the product to rain or moisture.
2. To avoid the risk of electric shock, do not open the case. Installation and maintenance should only be carried out by qualified technicians.
3. Do not use the product at temperatures, humidity or power sources higher than specified.

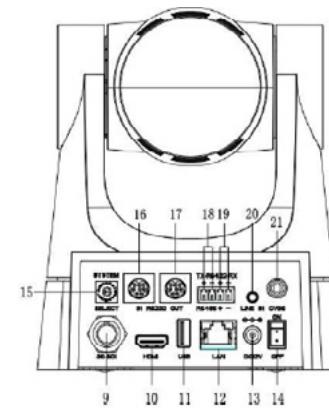

#### Setting up

Do not violently rotate the camera head, otherwise it may cause mechanical failure. This product should be placed on a stable desktop or other horizontal surface. Do not install the product obliquely, otherwise it may display a tilted image. Make sure there are no obstacles in the bracket's turning radius. Please do not power on before fully installed.

## 12. Interface

1. Camera Lens
2. Power Light
3. Status Light
4. Infrared Receiver
5. Tripod Screw Hole
6. Tripod Screw Hole
7. Screw Hole for Tripod
8. Safe Lock
9. 3G-SDI Output Interface
10. HDMI Output Interface
11. USB2.0 Interface (USB flash drive port only)
12. LAN Port (NDI)
13. DC12V Input Power Supply Socket
14. Power Switch
15. Rotary DIP Switch
16. RS232 Control Interface (input )
17. RS232 Control Interface (output )
18. RS485 Input (left +, right -)
19. RS422 Input
20. Audio Input Interface (Line-in)
21. CVBS Output Interface
