Chroma, the timeless vinyl turntable

BLEU DE CHAUFFE x ELIPSON

Innovation and excellence are the common points that unite two French historical ambassadors: Bleu de chauffe and Elipson.

« Fashions pass, style is eternal... »
[Yves Saint Laurent]

An adage that resonates at the heart of an exclusive collaboration whose results - the Chroma platinum - combines pure and elegant lines with aged natural leather that gives it a timeless look.

The performance is not forgotten, Elipson have chosen to equip this turntable with a carbon arm, to reduce vibrations that can negatively affect the listening quality; not to mention including an Ortofon 2M Red cartridge which offers outstanding clarity for the listener.

The history

MAISON FONDÉE EN 1938

Created on the eve of the Second World War, Elipson is the oldest hi-fi brand in France. Depositary of the French sound - warm and articulated - the brand founded by Joseph Léon has always been distinguished by its research in acoustics and design, quite remarkable. The odyssey of sound in a way. In 2014, the Elipson team decided to develop a turntable for the mainstream, intended to support the return of the LP in the world. True to the spirit of the brand, the record player

had to be innovative and stylish, but also made in France. Thus, was born the very first hi-fi Bluetooth turntable made in France, the Chroma turntable. A vintage object, but also high-tech, embracing the codes of French elegance. A project that the brand's designers have brought to life by designing a record player with the rounded, subtle shapes that are characteristic of Elipson productions.

Bleu de Chauffe is a committed and responsible leather goods company. Every day, for more than ten years, we have taken up a challenge: to manufacture exceptional pieces in France with the greatest respect for our craftsmen and the environment. From the tanning of the leather, to the cutting and stitching, each Bleu de Chauffe piece is

born of a combination of craftsmanship and innovation, ethics and design. We believe that it is possible to produce more fairly and sustainably without compromising our love for beautiful objects and to offer you, quite simply, ethics and design, within reach.

Exclusivity and style

The Chroma turntable uses high-end and unique materials: carbon, vegetable-tanned leather and birch plywood.

Used in the world of interior design, birch plywood is an authentic and lively material, while vegetable leather, favored by the greatest furniture designers, gives this exclusive collaboration an exceptional character. Handmade, the Chroma turntable is available in 50 unique and numbered copies.

Designed and produced entirely in France, between Burgundy and Aveyron, the Chroma turntable is made of exceptional materials both in terms of aesthetics and acoustic quality.

The combination of birch wood and aged natural leather absorbs the waves and avoids any disturbance during playback.

The Chroma turntable inherits the latest technologies developed by Elipson on its vinyl turntables. It integrates the new ASC digital drive motor, a phono preamp and a Bluetooth transmitter, allowing it to be easily connected to any connected hi-fi system.

An exemplary union between elegance and performance.

How to maintain your turntable

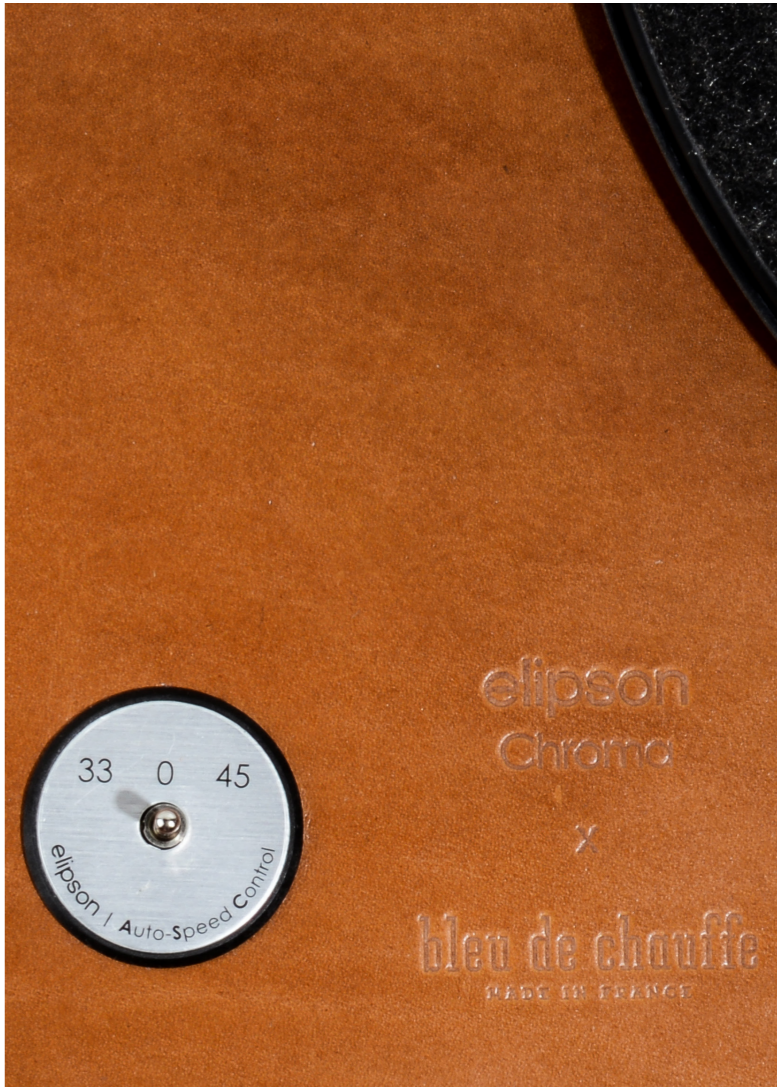

Produced in the most renowned artisanal tanneries, full grain vegetable tanned leather is used for most of the Bleu de Chauffe bags and the Elipson X Bleu de Chauffe turntable. Soft to the touch, it is a living material that evolves over time and develops an incomparable and unique patina.

Cleaning and nourishing the full grain vegetable tanned leather of your turntable is simple. First, remove dust with a damp cloth. Then let the leather dry. When the leather is dry, apply the natural leather cream with a soaked cloth, which allows you to clean and nourish the leather. Repeat this operation at most once a year.

Bleu de Chauffe has designed a complete line of leather care accessories and natural maintenance products perfectly adapted to full grain vegetable tanned leather.

Our complete maintenance kit includes a shine brush, a natural leather cream and a shine chamois.

The buffing brush is a silk bristle brush made in France, to be used with the natural cream, or as a finishing touch, to polish your turntable.

Characteristics

Frame : Glued laminated birch
Top : Stamped steel
Arm : Carbon
Cartridge : Ortofon 2M RED
Adapter 45 Tr : Aluminum
Built-in electronics: RIAA pre-amp
high end Bluetooth aptX
Opto-isolated USB port
Dimensions (mm): W450 x H120 x D380
Weight : 5.8 kg

RIAA module

Bandwidth: 25 Hz-20 kHz (-3 dB/+1 dB)
Gain: 40.5 dB (MM), 61 dB (MC)
Crosstalk: 88 dB (MM), 78 dB (MC)
Distortion: 0.006% (MM), 0.05% (MC)
Signal-to-noise ratio: 82 dB (MM), 76 dB (MC)

BLUETOOTH module

Bluetooth Class 2: 2.5 mW - 4 dBm range: 10 m
Bluetooth 2.4 G : 2.402 to 2.480 GHz

Record clamp sold separately
