

elipson® | Chroma 400 RIAA

TURNTABLE

It is distinguished by a new axis system for an even more precise rotation.

The Elipson Chroma 400 RIAA is a belt-driven manual turntable with an elegant design offering a lacquered paint or satin wood finish. Benefiting from our latest technologies, it can be connected directly to any amplifier or active speaker.

Assembled in France in our premises, the Elipson Chroma 400 RIAA offers the characteristics that contributed to the success of the Omega models such as the OTT (Orbital Torsion Tonearm) tonearm in carbon, its digital processing system of the motor rotation. It is distinguished by a new axis system for an even more precise rotation, an improved drive motor with optimized damping, a graduated counterweight, as well as by the addition of a cue control lever for your comfort of use

Its integrated Phono-RIAA circuitry offers all the features of more expensive separate components with a choice of moving magnet and moving coil cartridge as well as a very high and faithful resolution of vinyl record signals.

TECHNICAL

Chassis

MDF PU painting or wood veneer

Plate

Pressed steel

Tonearm

Carbon

Cartridge

Ortofon OM10

Adapter

Aluminium

Electronics

Built-in high-end RIAA preamp
