

Ultimate Technical Record

Test disc and running in system for high-fidelity. The test disc includes many technique tracks to adjust your high fidelity system. It also contains signals specially developed for the running in of electronic equipment, loudspeakers (bookshelf or floorstander) and subwoofers. The sinus sweep can perform measurements and detect vibrations carried objects in the listening room. Mastered and pressed into 180g by MPO in France. Designed and manufactured in France.
