

elipson® | INFINITE in-ceiling 6/8

HIGH END IN-CEILING LOUDSPEAKERS

Discret design,
spectral richness
and power handling
are the key words of
the INF 6 & 8 .

Taking up the aesthetic codes of the IN-CEILING, these in-wall and in-ceiling loudspeakers are much more accomplished by their sound rendering and allow you to provide sound in large spaces, to offer a quality worthy of a home quality to your interior, or even complete in Atmos the In/On Wall loudspeakers of the famous Infinite range

Developed in 2 way coaxial, the INF 6 and 8 speakers are equipped with a 6" and 8" carbon fiber bass-midrange driver respectively, initiated by the Infinite 8 & 12, offering a rich midrange and deep, accurate bass.

The 3/4" and 1" titanium dome tweeters which can be rotated by 30° in all directions, contribute to the richness of the sound.
