

The Prestige Facet Sub range has been extended with the new PF Sub 12 active subwoofer.

This subwoofer is equipped with a 12" driver with a glass fibre cone for optimal frequency response thanks to its pistonic behaviour. It is designed as a bass-reflex "Down Firing" speaker in a rigid and inert enclosure, amplified by a 500 W class D module.

It also has a removable base that allows it to be used in closed mode by inserting a dense foam cylinder in the port. In bass-reflex mode, it offers a bass impact around the 40 Hz centre frequency for home theatre systems.

In closed mode, the impact level is reduced for better exploration of the very low frequencies below 30 Hz, suitable for a Hi-Fi setup.

TECHNICAL

Type

Powered subwoofer

Driver unit

Woofer : 12" glass fibre cone

Frequency response ($\pm 3\text{dB}$)

22 Hz - 200 Hz

Power

500 W RMS Classe D

Variable cut-off frequency

30 Hz à 200 Hz

Subsonic Filter

24 dB à 20 Hz

Phase selector

0° / 180°

Auto On/Off

Auto

Inputs

Stereo line level, LFE
