

Ceiling-mount bracket

In some cases it is just impossible to mount MASK2 speakers on the wall...

The MASK2CMT bracket makes it possible to install the MASK2 speaker on the ceiling. This small metal extension piece can be installed upon the existing MASK2 wall mount. The additional piece is an extension on the original bracket to allow ceiling mounting. A lot more inclination of your MASK2 speaker mounted on the ceiling will be possible with the MASK2CMT!

The ceiling-mount brackets are available in black (MASK2CMT-BL) and white (MASK2CMT-W).
