

JURA POWER CABLE

DESCRIPTION

- High End connectors made in aluminum and carbon fiber equipped with Rhodium Rh45 plated pure copper plugs for optimum conductivity and contact strength.
- Large cross-section High Purity OCC – 6N conductors (5,23mm² / 10 AWG) with a STAR structure: 6 concentric stranded conductors around a central stranded conductor for high dynamic, capacity perfect signal transfer and velocity.
- Triple shielding for perfect insulation against electromagnetic and radiophonic interferences (RFI & EMI): optimal cotton fibre to limit micro-vibrations inner, peripheral insulation in aluminum-mylar foil and thick PVC with fabric braid on the outside.
- Conductors screwed directly to the connectors without tinsolder, minimizing impedance and ensuring perfect current transfer.

SPECIFICATIONS

- Finish : Black and silver fabric braid
Flexible texture
Power socket : 1 x Schuko type power socket
Aluminium and carbon fiber body
Connector : 1 x 3-pole connector IEC-C15
Aluminium and carbon fiber body
