

LIMITED EDITION

LIMITED EDITION 30 | 15 anniversary

We celebrate 30 years of pushing beyond the limits of the pro-audio world which started from our hands-on experiences directly in the field without putting any brakes on our imagination and being the first in what we propose as a commitment to give a unique yet powerful sound experience to people, sharing the same emotions transmitted by those intense vibrations that only sound can make.

With the same passion we present our **Pinnacle-KR402** Limited Edition 2020-21: the tangible K-array's contribution to the development of innovative technologies and the creation of unprecedented objects that with their beauty and highest performances have the ability to convey a story and project themselves into the future, with a design that never compromises sound quality.

The Pinnacle Limited edition features a whole black body with polished stainless steel grills to elegantly blend into the surrounding surfaces and objects of the environment.

Every system has a dedicated polished plaque with the three K-array founders' signatures and the progressive number of the limited series.

This limited edition keeps the same technical specifications of our new **Pinnacle-KR402 Mark II**.
