

# RCU 1

## SNMP Management System RCU 1

The head-end station management system RCU 1 shows the following features:

- SNMP capable management interface (LAN); connection with a LAN router via DSL as standard
- Enquiry and controlling of the most important parameters and device data via remote control with the GUI of the head-end station software PSW 1000
- Non volatile storage of the configuration data (back-up storage) of every channel with the remote PC
- Software update via FTP connection
- Failure signalling and transferring of error messages
- Error messages via email
- Graphical user interface / Simulation of the control unit optimised for PDAs
- Time-controlled switching on and off of the cassettes
- Automatic monitoring of level-, bit error rate-, RDS- and line synchronous pulse with PSCU 6000
