

Performance

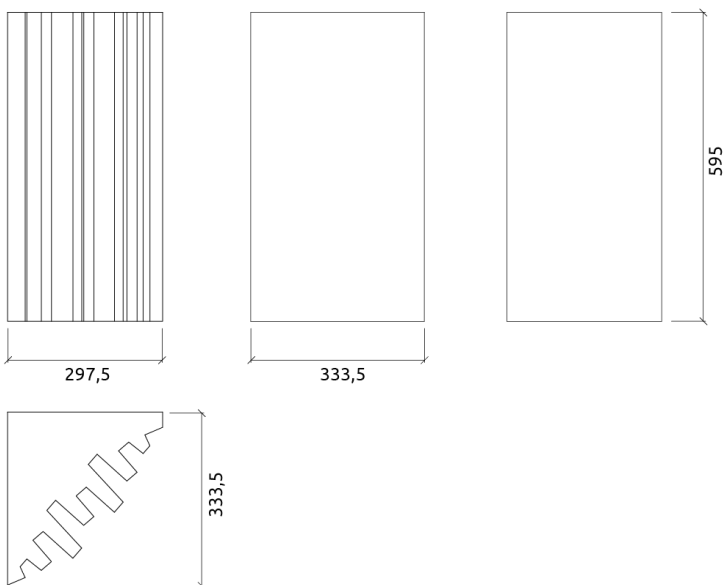

Features

Symmetry and efficiency on a low cost bass trap.

The Agad Bass Trap 2.0, made of 100% foam, aims to treat the lower reflection problems in your room, within the 70 Hz and 350 Hz frequency range.

Technical Information

Dimensions:

FG | 297x595x333mm | 0.8 Kg

Following the same principles that inspired the Agad absorber, we created this low cost and highly effective bass trap, designed to work with our Agad absorber. The Agad Bass Trap, made entirely of foam, aims to treat the lower reflection problems in your room, within 70 Hz and 350 Hz. We recommend you use this panel in corners for maximum efficiency.
