

## Absorber Core Cinema Series

Ideal for reducing flutter echoes and excessive reverberations, the Absorber Core is made from a recyclable PET, providing broadband absorption. This PET core features a perforated pattern focused at the treble zone. Designed to capture sound waves and minimise reflections, it creates a balanced acoustic environment.

### Composition

- HMDF structure
- Sound PET acoustic core - Euro Class B

## Finishes

(FG - PP) Painted Primer Finishes

(W07)  
Black
