

The Apart CMS608 2-way square built-in loudspeaker is loved by every interior designer for its beautiful shape and perfect sound quality. The loudspeaker has a 6 1/2" woofer and 1" tweeter. The quality of the selected components and the AP built in filter results in a HiFi-Pro sound quality. It makes the CMS608 very suitable for music and speech.

The housing is made of high quality ABS. Because of the special enforced polypropylen woofer and the aluminium grille, this speaker can be used in humid environments. The new enforced structure of the woofer cone, results in an even more clear sound and less distortion.

The loudspeaker is easy to install, due to its simple, quick mounting system (4 screws which are hidden behind the loudspeakergrill, which gives the loudspeaker a modern and striking design).

The standard colour is white RAL 9010. As an option the CMS608 can be painted in any RAL colour (Ref; PAINT-CM). Please note that the minimum order quantity for PAINT-CM is 12 pieces.
