RDM2go

The RDM2go is a multi-functional tool for working with fixtures over a DMX/RDM data line. The palm-sized controller performs a multitude of tasks including RDM functionality, DMX snapshot and test-scene record and playback, Ilumicode addressing for Iluminarc fixtures and DMX input and output monitoring. The RDM2go also features a built in DMX cable integrity checker, and an easy to ready OLED display. The unit easily recharges via a standard micro USB jack and comes with a convenient carry pouch and connector convertors.

At a Glance

- Handheld tool for managing fixtures and systems with DMX, RDM, and Ilumicode based control

- Easily address, locate and monitor RDM capable fixtures

- Check DMX addressing, cabling, and store/playback basic snapshots

- Address and set personalities of Ilumicode based architectural fixtures

- Address and set personalities of Ilumicode based architectural fixtures
