

# Siena K | New Finishes

*Unlock better acoustics with expertly crafted design*

Designed with a precise 7mm spacing between slats and an acoustic PET layer, Siena K not only offers a visually appealing aesthetic but also plays a crucial role in elevating your audio experience. By specifically absorbing mid and high frequencies, it improves speech intelligibility, making conversations clearer and more enjoyable. Additionally, the wooden slatted front incorporates slats of various widths, determined by a unique algorithm developed by Artnovion. This unique design diffuses sound waves, ensuring an even distribution of reflected sound energy across different frequencies and angles. This translates to a healthier environment throughout the working space.

Siena K is made using sustainably sourced wood over a recycled PET core. Available in wooden finishes over dark PET.

## Fire Safety

Siena K FR complies with the highest fire safety standards and is certified as **class B-s1, d0** according to European standard.

## Features

Absorption Range:  
800 Hz to 5000 Hz | NRC 0,60

Acoustic Class:  
Class D

## Purpose

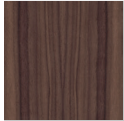

- RT reduction
- Improving speech intelligibility
- Flutter echo control
- Reducing excessive reverberation
